

24 June 2020

Dear Staff and Students

ANNOUNCING TWO MORE COVID-19 POSITIVE CASES: ALICE CAMPUS

New Infections:

This notice serves to advise the community that the number of Covid-19 positive employees has risen by two. Both staff members are attached to the Alice campus. One is in the **Agronomy department** (Faculty of Science and Agriculture) and the other is in the **Financial Aid and Bursaries department**.

Thus far, eight (8 employees) have tested positive for Covid-19. As per usual, the university will implement all applicable safety protocols to ensure both buildings are decontaminated and possible contacts are identified and processed as prescribed by law.

Both colleagues are in isolation and we wish them strength and courage.

Recoveries:

The university is pleased to announce that of the six previously announced cases – **five (5) have recovered fully**. The sixth colleague is in the final stage of the recovery process. We congratulate all of them on this magnificent achievement. We trust that their recovery will serve as motivation to all of us to remain positive, keep safe and stay healthy.

Sincerely

Tandi Mapukata
University Spokesperson
